Wentzel Electric Has Been Family Owned & Operated for over 43 years!

OUR HISTORY

Wentzel Electric was established in 1964 by Richard G Wentzel, whose professional standards laid the foundation for success. The character of a corporation is formed much like the character of a person by honoring strong values and ethical conduct. Well known and respected, the company built a reputation for trustworthy and knowledgeable services.

In 1992, the family business was managed by the late Christie Warner, who continued the same respected business practices she learned from her father, Richard Wentzel. She smoothed the foundation her father laid and perfected every aspect of the business to the best of her abilities.

In 2005, Gabriel (Gabe) Warner assumed the position of President shortly after his mother's passing. He has taken the responsibility of continuing to ensure that his family name is and will always remain respected and honored very seriously. In an industry where respect is not easily conferred, Wentzel Electric's extensive field experience, fairness, and honesty earn the trust of customers, employees, and friendly competitors.

SCHEDULING

Wentzel Electrical is adept at planning and scheduling labor and material for simultaneous projects. Trust us to identify appropriate milestones, develop an appropriate calendar, then adhere to it in an effort to complete your job on time - and on budget.

BUDGETING

Our experience in a variety of environments enables us to make accurate budgets for materials, labor hours and direct job expenses. Our budgeting and value engineering software gives us the power to create detailed cost breakdowns for jobs of any size.

DESIGN BUILD

Whether you are adding light to a dark corner, creating attention to that perfect piece of art, or completely remodeling your home or business, **Wentzel Electric** can provide the dramatic affects you are looking for. Let our team design your next project. With fair pricing, a professional staff, and our outstanding attention to detail, how can you go wrong?

GENERATOR INSTALLATION

How long was your power out?
Wentzel Electric offers several options to prevent the headaches that a power failure can bring. If you are a business owner, you will know the expense a power outage can and probably already have can occur.

We offer digital portable power for an inexpensive way to keep the necessary items powered for a short power outage.

Wentzel Electric can also customize a stand by generator to suit your home or business needs in a power outage.
